

water vapor which is the best description of the nature of light. a. light always behaves like waves. b. light always behaves like particles.

nats102 laboratory activity spectroscopy - studying the light from distant stars and galaxies. fortunately, the physical processes that occur in stars and galaxies leave an imprint on the spectrum of the light they radiate. light is a wave in many ways, light behaves like the waves you see in water. imagine that you are standing near a pond filled with water.

light and optical systems - quia - of light? 174 mhr light and optical systems we have opened up the universe to our eyes. how? with the ... like the sun, light from a bulb radiates in all directions. ... deal about how light behaves as you study this unit. find out is light energetic? in the introduction, you read that light is a form ...

electrons in atoms - shhs home - study guide for content mastery chemistry: matter and change chapter 5 25 electrons in atoms section 5.1 light and quantized energy in your textbook, read about the wave nature of light. use each of the terms below just once to complete the passage. electromagnetic radiation is a kind of (1) that behaves like a(n)

physical science chapter 16: sound & light study guide - light can be modeled as a ray in the _____ that light travels a light ray is a model of _____ that represents light traveling through space in an imaginary straight line. geometrical optics is the study of light in circumstances where _____ behaves like a ray. reflection
